# MD SHARIK ANSARI

Java Backend Developer

mdsharik828@gmail.com | Asansol, West Bengal, India

linkedin.com/in/mdsharikansari | github.com/mdsharikansari | leetcode.com/u/mdsharikansari

## PROFESSIONAL SUMMARY

Computer Science and Engineering student seeking a backend development internship or entry-level software engineering role. Hands-on experience building REST APIs with Java, Spring Boot, Spring Data JPA and MySQL, including JWT-based authentication with Spring Security. Practises data structures and algorithms in Java and has built an AI agent using Python and Google Gemini.

## EDUCATION

**Bachelor of Technology (B.Tech), Computer Science and Engineering** | 2024 - 2028 (Expected)
NSHM Knowledge Campus, Durgapur, West Bengal, India

## TECHNICAL SKILLS

**Languages:** Java, SQL, Python, JavaScript, HTML, CSS
**Backend:** Spring Boot, Spring Web, Spring Data JPA, Spring Security, REST APIs, JWT authentication, Lombok
**Databases:** MySQL, H2
**Core Computer Science:** Data Structures and Algorithms, Object-Oriented Programming, Java Collections, Streams and Lambda Expressions, Exception Handling
**Tools:** Git, GitHub, Maven, IntelliJ IDEA, Postman
**AI:** Google Gemini, ReAct-style AI agents, LLM tool use, Serper API, Open-Meteo API

## PROJECTS

**Secure Blog API** | Java, Spring Boot, Spring Security, Auth0 Java JWT, Spring Data JPA, MySQL, Maven
- Built a REST API for a multi-user blogging platform with user registration, login, bcrypt password hashing, and JWT generation and validation.
- Protected post creation with Bearer-token authentication while keeping registration, login and post retrieval public.

**Student Management System API** | Java, Spring Boot, Spring Data JPA, MySQL, Lombok, Maven
- Developed REST endpoints to create and retrieve students and courses and to enroll students in courses.
- Modelled a many-to-many (@ManyToMany) relationship between students and courses and persisted it in MySQL using JPA.

**Task Tracker API** | Java, Spring Boot, Spring Data JPA, MySQL, Lombok, Maven
- Built CRUD endpoints for tasks (title, description, completion status), persisted in MySQL using Spring Data JPA.
- Separated HTTP endpoints from data access to keep the backend organised and easy to extend.

**Bank Customer Management REST API** | Java, Spring Boot, Spring Data JPA, H2, Maven, Postman
- Implemented customer create, read, update and delete operations with generated IDs and unique email validation.
- Structured the application into controller, service, repository and model layers; tested endpoints with Postman (educational project using an in-memory H2 database).

**Console Banking Application** | Core Java, OOP, Collections, Streams
- Built a console application for savings and current accounts supporting deposits, withdrawals, transfers, transaction statements and account search by customer name.
- Applied service/repository layering, custom exceptions, input validation, and lambdas, streams and Optional with in-memory collections.

**AI Trip Planner Agent** | Python, Google Gemini, Serper API, Open-Meteo API, Kaggle Notebooks
- Built a ReAct-style agent that uses Gemini to reason, call Google Search (via Serper) and Open-Meteo weather data, and produce a practical travel itinerary.

## CERTIFICATIONS

- Java Masterclass for Absolute Beginners - Skills Marathon (Oct 2026)
- 5-Day AI Agents Intensive Course with Google - Kaggle (Dec 2025)
- Data Structures and Algorithms in Java - LearnYard (2024)
- Machine Learning for Data Science Projects - IBM SkillsBuild (Jun 2026)
- JavaScript for Freshers - Uday Academy (Oct 2026)
- HTML and CSS: The Complete Web Development Guide - Muhammad Riaz Uddin (Oct 2026)
